A snail does not have a nose. But it can smell. A snail uses its skin to smell.
A snail can smell leaves to eat. Here is one eating the leaves on a plant.

A snail can smell a safe place to hide. Here it is hiding.
Many birds cannot smell very well. Birds use their eyes to find food to eat.
Birds have beaks, not noses. Some birds have huge beaks. Some birds have little beaks.

This bird has a huge beak. But a huge beak does not mean that a bird can smell well.
Look at the elephant as it says hi with its trunk. Can you say hi with your nose?
An elephant’s nose is called a trunk. It can smell things just like you can smell things with your nose.

Look at the elephant grab leaves to eat with its trunk. Can you eat with your nose?
Which Is It?

☐ Picking up a snail.
☐ Picking up leaves.
- Elephant’s trunk
- Bird’s beak
- A bird looking for food.
- A bird drinking water.
I put on my boots. Elephants do not need boots to stomp, stomp, stomp in the rain.
Elephants have feet just like you and me. They have four feet. I only have two.

See elephants have nails on their feet too! They only have two or three. I have five.
I find my snail by looking for its slime. 
There is my snail!
Look at my pet snail move. See how my snail uses its one foot to move from place to place?

Look at my snail move upside down! See how my snail leaves its slime behind him?
My feet do not let me swim as fast as ducks or stay in trees like eagles. But I have feet that let me run and hop!
Birds have many kinds of feet. Ducks have feet that help them swim.

Eagles have feet that help them grab onto parts of trees. They can sit at the top of the tree and not fall down.
☐ A bird swimming.
☐ A bird running.
□ Three nails
□ Five nails

□ Upside down
□ Fall down
An eagle uses its eyes to find food to eat. It can see the fish.
An eagle flies high in the sky. It is looking for food to eat. Can an eagle smell a fish as it flies high in the sky?

No, an eagle cannot smell a fish from high in the sky.
The snail moves its head slowly. The eyes on the top of stalks lets a snail see all around it.
Some snails have two eyes. Other snails have more than two eyes. But all snails have their eyes on top of stalks.

The stalks with eyes can bend. They can move up or down. They can move from side to side.
You can see better than an elephant.
But you cannot hear things as well as an elephant. You cannot smell things as well as an elephant.
The elephant is the biggest animal that lives on land. The ears and nose of an elephant are huge.

An elephant’s eyes are not huge like its ears and nose. An elephant’s eyes are just a little bigger than your eyes.
□ High in the sky
□ Upside down
□ Moving
□ Bending

□ Smelling food
□ Seeing food
