Colors of Sand

LEVEL A-7: Sand | Book 3

written by Elfrieda H. Hiebert & Wendy Svec

This boy runs on white sand.

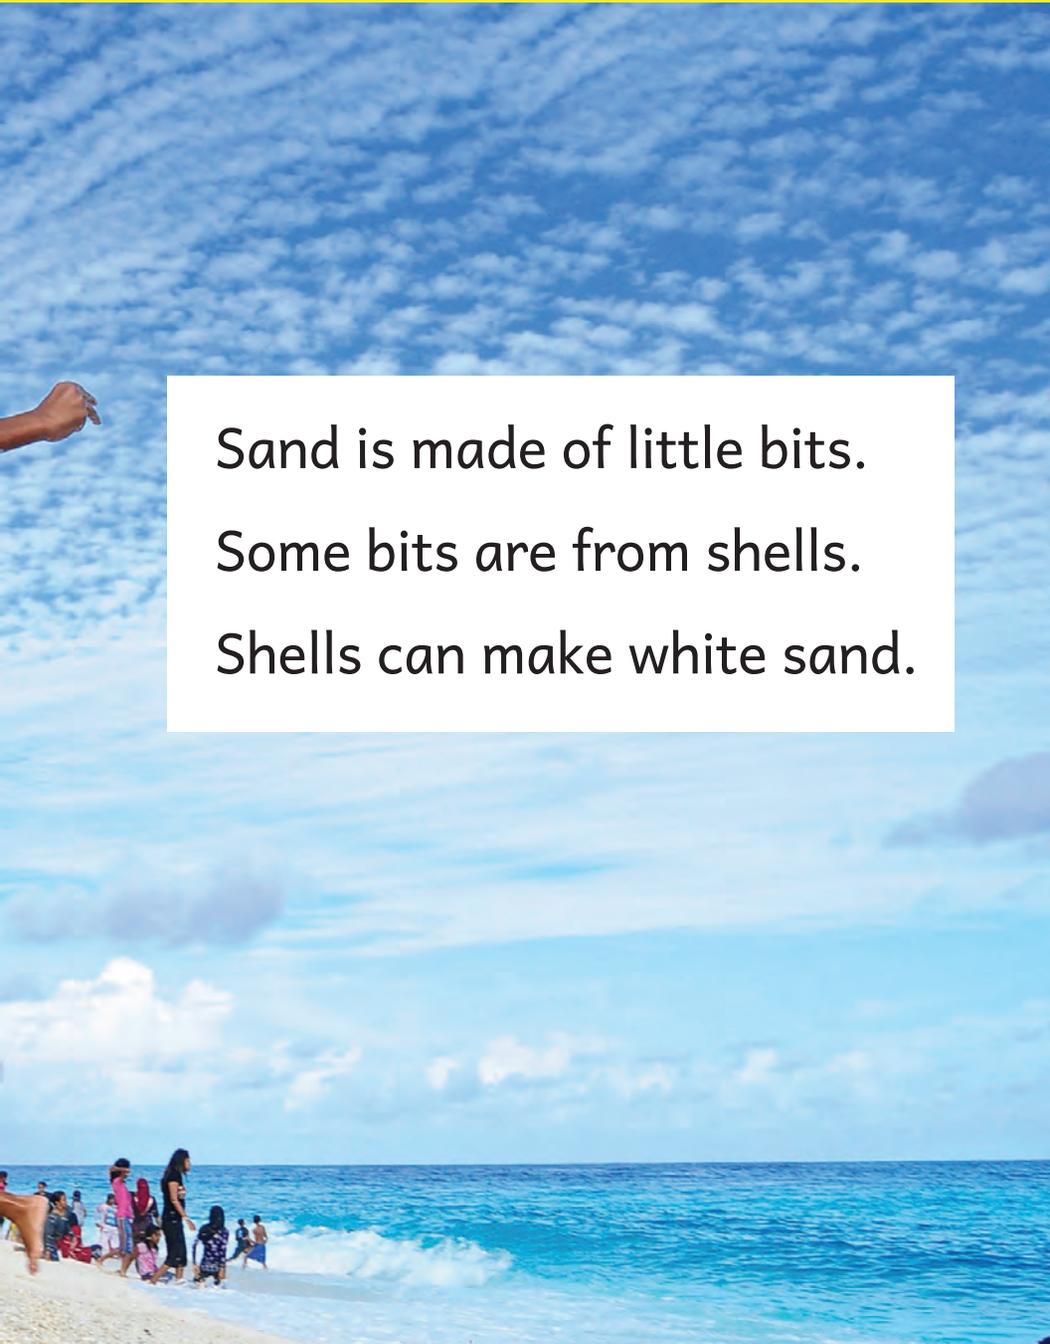

Some sand can be pink.

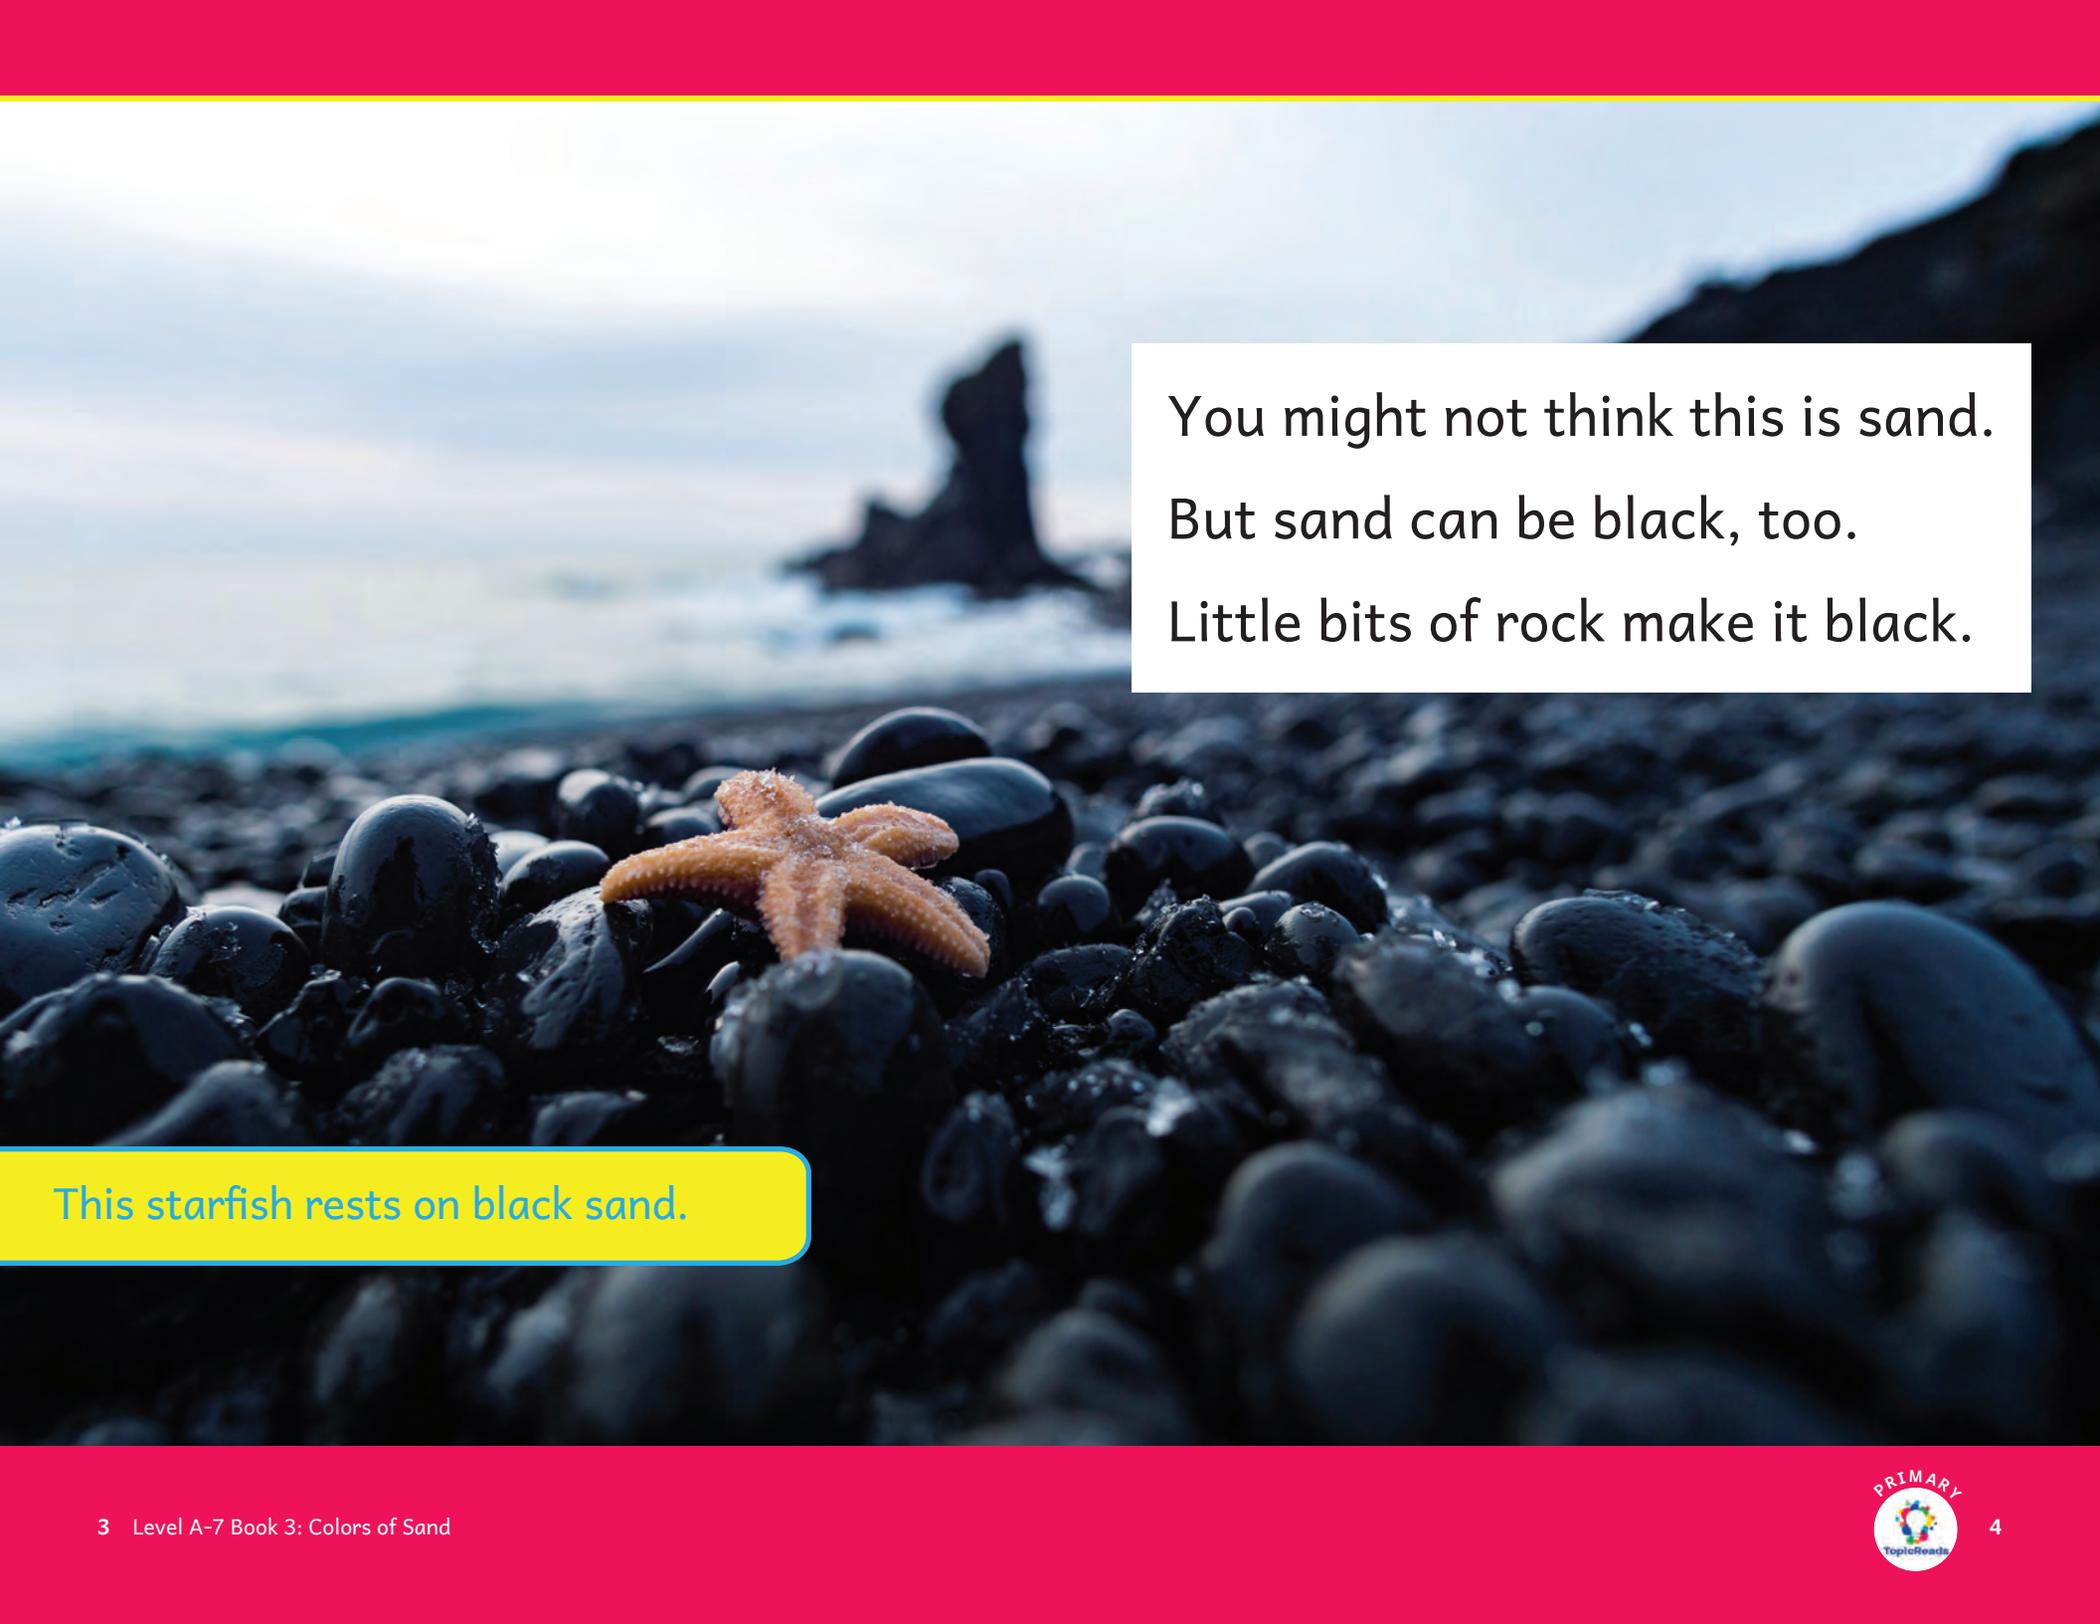

The pink comes from bits of bugs!

This sand is made from pink bugs.

Sand is made of little bits.
Some bits are from shells.
Shells can make white sand.

A close-up photograph of a bright orange starfish resting on a beach of black sand. The sand is composed of small, dark, rounded pebbles. In the background, the ocean waves are visible, and a dark rock formation stands in the distance under a cloudy sky.

You might not think this is sand.
But sand can be black, too.
Little bits of rock make it black.

This starfish rests on black sand.
