Redwood Trees

LEVEL C-3: Trees | Book 4

written by Elfrieda H. Hiebert & Alia Pugh

Redwoods can grow very tall.

Redwood roots only grow about six to twelve feet deep.

That's not very deep for such a tall tree!

The roots of a redwood are not very deep.

Redwood trees are very tall trees.

There are two kinds of redwood trees in the United States.

The first kind is the giant redwood.

Redwoods grow very fast.

Coast redwoods are the second kind.

They grow on the west coast.

Young coast redwoods grow about six feet each year.

That's fast for a tree!
