# Rain

**LEVEL C-11 Weather | Book 1**

written by Elfrieda H. Hiebert & Wendy Svec

Rain comes from water in clouds.

But we need rain.

We need rain to make things grow.

And we need rain to make a rainbow.

Rainbows form when we can see sunlight through raindrops.

We look outside and hope for sunshine.  
But sometimes the sun does not shine.  
What we see is rain.

Rain drops can be light.

Rain can be heavy too.

We can get wet even with an umbrella!

A rainstorm comes when warm, moist air rises very fast.
