Places With Snakes

LEVEL C-6: Snakes | Book 3

written by Elfrieda H. Hiebert & Wendy Svec

A rattlesnake makes a sound like a baby's rattle, if you get too close.

Only a few snakes live where it is very cold.

Snakes are cold-blooded.

They need to be in warm places to stay alive.

Snakes live in many places on earth.
The same kinds of snakes are not
found in every place.
Rattlesnakes live where it is very hot.

Garter snakes like damp, grassy places.

Garter snakes like places where they can get water.

Often they live close to streams or ponds.

But they can also be found in parks and gardens.
