What Snakes Can Do

LEVEL C-6: Snakes | Book 1

written by Elfrieda H. Hiebert & Wendy Svec

Most snakes have from 300 to 400 bones.

Snakes do not have fins, like fish.
Yet some snakes can swim in the sea.
Some snakes like to float on the water.

Some snakes dive under water.

Snakes look like a long tail with a small head.

But inside that long tail are many bones.

Snakes have many more bones in their spines than people do.

These long spines mean that snakes can move in special ways.

Snakes grip, bend, and pull
to climb a tree.

Snakes do not have arms or legs.
Yet they can do lots of things.
Some snakes can climb trees.
