Fog and Smog

LEVEL C-11 Weather | Book 4

written by Elfrieda H. Hiebert & Wendy Svec

Fog can form if cold air moves over warm water.

Smog can be harmful for your lungs. It's best to stay inside on a smoggy day.

Try to cover your face, if you must go out.

This girl points to the smog in her city.

Fog is a kind of weather.

Fog is made by water drops in the air.

It can be hard to see on a foggy day.

A photograph of a city skyline obscured by a thick layer of smog. The buildings are silhouetted against a hazy, orange-tinted sky. In the foreground, there is a dense forest of trees with green and brown foliage. A white text box is overlaid on the right side of the image.

Smog can look a lot like fog.
But smog is more than fog.
Smog is a mix of fog and unclean air.

Can you see the tops of tall buildings
above the smog?
