

What Can We Make With Dough?

Dough is special!

It is soft and squishy like play-dough, but we can eat it after we bake it.

To make dough, we mix flour and water together.

Sometimes we add eggs and milk too.

When we bake dough, it can turn into lots of yummy things to eat!

We can make a big loaf of bread. The loaf is crusty on the outside but soft inside.

When we slice bread and cook it again, it turns into crunchy toast.

We can roll dough into round buns.

Buns are just right for hamburgers.

Dough can become puffy muffins.

Muffins are sweet and good for snacks

We can pat dough flat to make biscuits. Biscuits are good with butter or jam.

Isn't it amazing that all these yummy things start with dough?
