Dogs Have the Best Noses

A dog's nose is amazing. Dogs can smell their friends and yummy foods. They can even smell far, far away!

A dog can smell how you feel. Are you happy? A dog can tell. Are you scared? A dog can tell.

Dogs use their noses to help people. They can find lost people by smelling the ground. They follow the smell left behind, step by step, until they find them. Some dogs can track a person for many days!

Dogs can smell about 50 times better than people. That is why their noses are superpowers!
