Tree Needles

SET C-3: Trees | Book 2

written by Elfrieda H. Hiebert & Alia Pugh

Old needles are dark green.
Evergreens have red needles too.
Red means the needle will drop off soon.

When a needle turns red,
it will fall off soon.

Many evergreens do not have
leaves and flowers.

They have cones and needles.

Needles that are light green
are new needles.

Some needles fall off the trees.

New needles grow.

You can tell a new needle by its color.

New needles are light green.
