

Spring

© 2008 by David Quick. Some rights reserved (<http://creativecommons.org/licenses/by-nc-nd/2.0>).

Ewes need to eat lots of plants to make milk for their lambs. Spring is a time when there are lots of plants for ewes to eat.

Spring is a busy time on a farm. Many animals on a farm have their babies in the spring. Sheep are one of these animals.

© 2010 by Fred Riley. Some rights reserved (<http://creativecommons.org/licenses/by-nc/2.0>).

A mother sheep is called an ewe. Her baby is called a lamb. Ewes have their lambs in the spring.

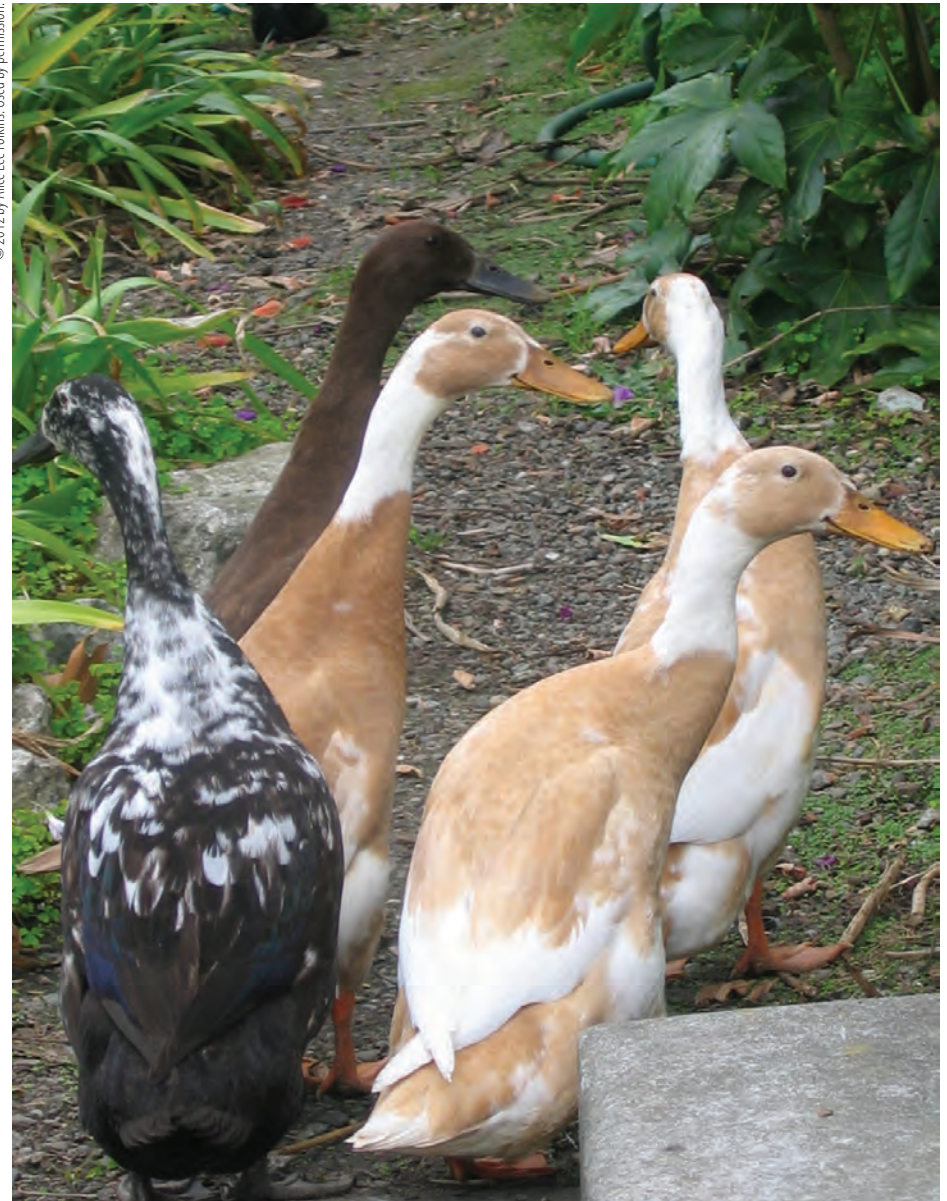

Ducks

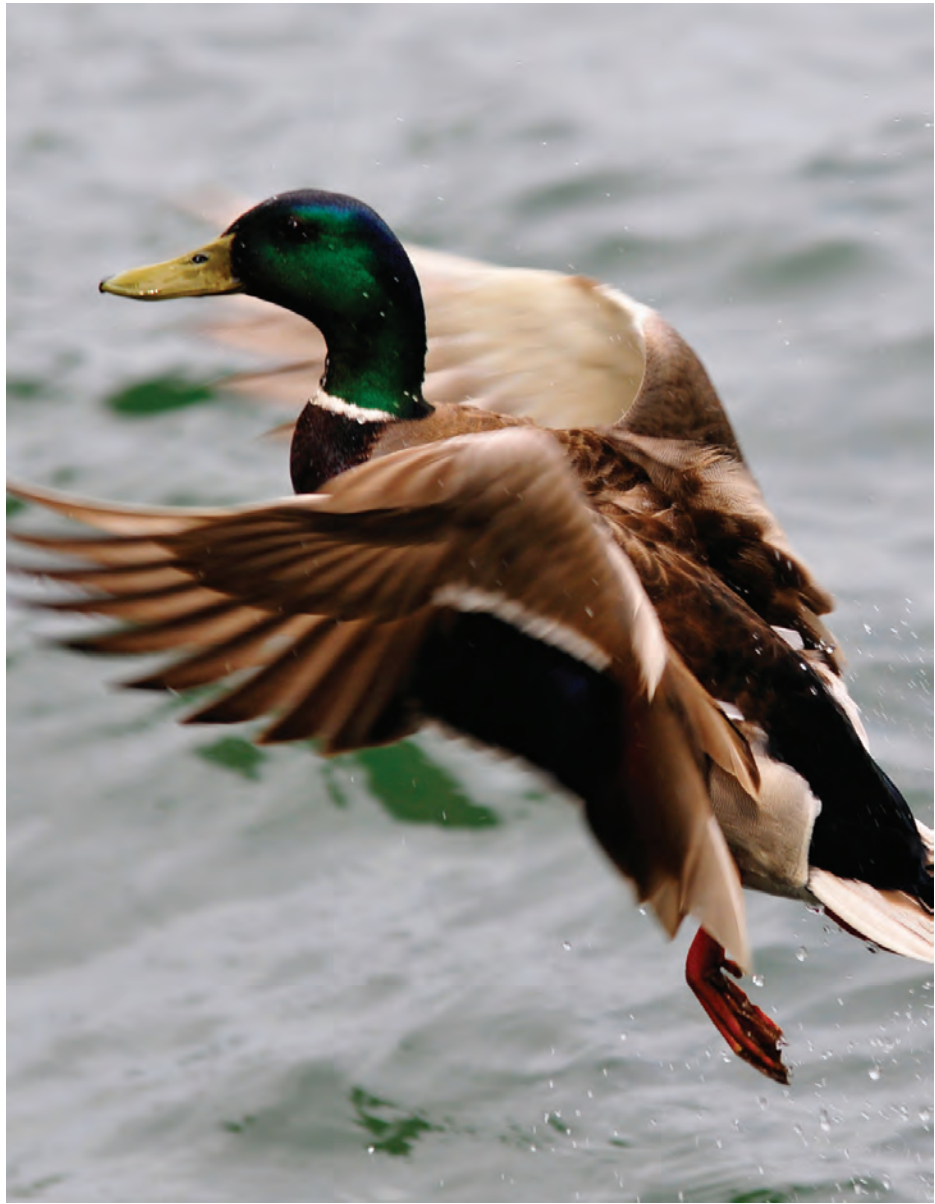

© 2010 by master philip at Flickr. Some rights reserved (http://creativecommons.org/licenses/by-nc-nd/3.0).

Mother ducks sit on the eggs. After 28 days, the eggs hatch. Soon, the mother ducks lead their ducklings to homes by a lake or pond.

v.1.0 © 2012 TextProject, Inc. Some rights reserved (http://creativecommons.org/licenses/by-nc-nd/3.0/us/).

© 2009 by christopher charles at Flickr. Some rights reserved (<http://creativecommons.org/licenses/by-nd/2.0>).

Ducks fly to warm places for the winter. In the spring, the ducks fly back.

© 2010 by TRAINUT at Flickr. Some rights reserved (<http://creativecommons.org/licenses/by-nd/2.0>).

The ducks find places to build nests. The mother ducks lay eggs in the nest. One duck can lay as many as 12 eggs.

Frogs

© 2008 by Beatty Drawn Dad at Flickr. Some rights reserved (<http://creativecommons.org/licenses/by-nc-nd/2.0>).

Once the eggs hatch, the tadpoles will live in the water. When tadpoles turn into frogs, they will live on land. But they will stay close to water.

v.1.0 © 2012 TextProject, Inc. Some rights reserved (<http://creativecommons.org/licenses/by-nc-nd/3.0/us/>).

© 2009 by Anthony Masi. Some rights reserved (<http://creativecommons.org/licenses/by/2.0>).

In the spring, frogs lay their eggs in water. The eggs need to stay wet. That is why frogs lay their eggs in water.

© 2011 by Geoff Gallice. Some rights reserved (<http://creativecommons.org/licenses/by/2.0>).

For some frogs, the water can be a small puddle in a garden. For other frogs, the water is a pond or a lake.

Which Is It?

v.1.0 © 2012 TextProject, Inc. Some rights reserved (<http://creativecommons.org/licenses/by-nc-nd/3.0/us/>).

© 2008 by azglen at Flickr. Some rights reserved (<http://creativecommons.org/licenses/by-nc-nd/2.0>).

There is very little color in a desert for most of the year. Spring is the time of year when the desert is full of color.

© 2009 by Grand Canyon NPS at Flickr. Some rights reserved (<http://creativecommons.org/licenses/by/2.0>).

Desert plants get water in the spring.
Sometimes, the water is from rain.
Sometimes, water comes from streams made from melting snow in mountains.

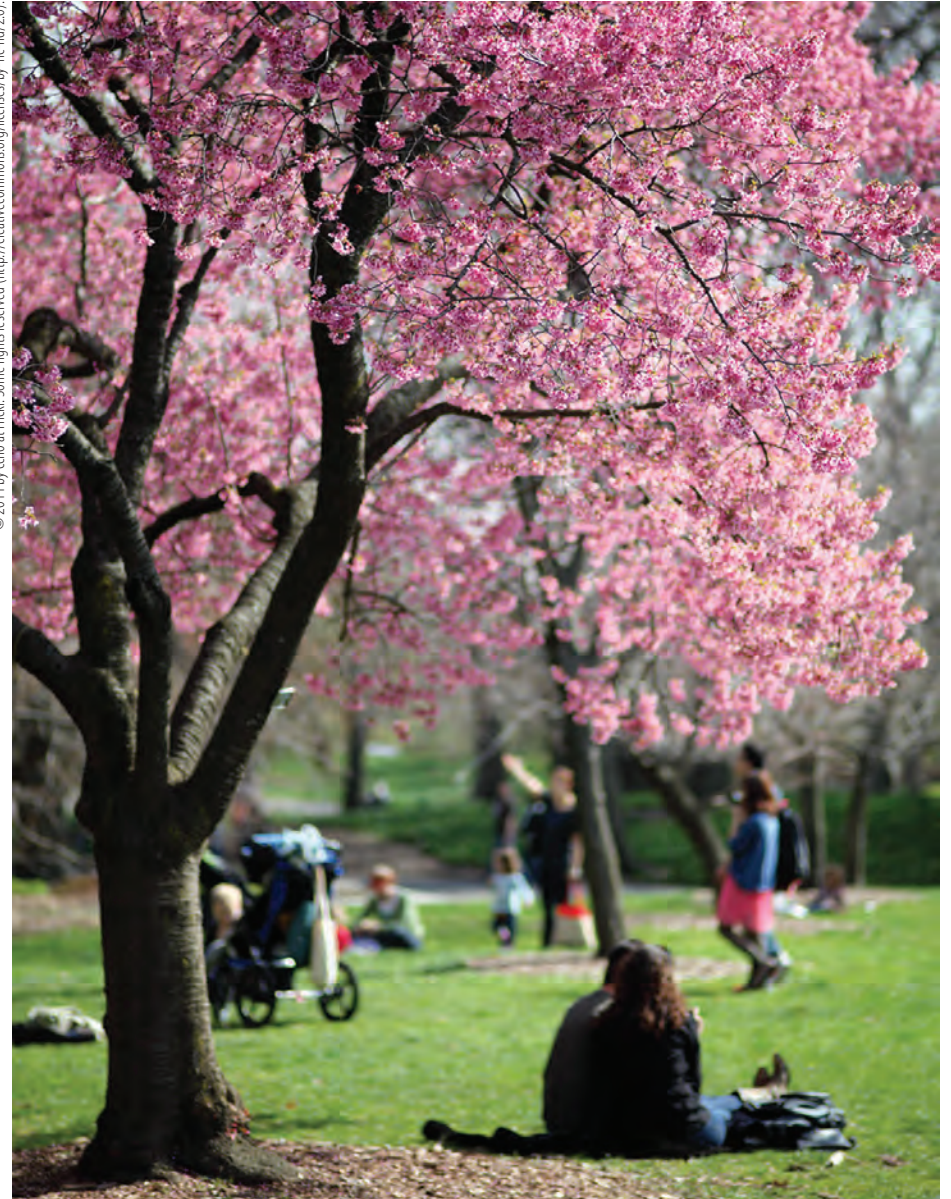

Cherry Tree

© 2012 by Alice Lee Collins. Used by permission.

We are happy when we see the tree filled with red, pink, and white flowers. Soon there will be cherries to pick and eat!

© 2011 by ccho at Flickr. Some rights reserved (http://creativecommons.org/licenses/by-nc-nd/2.0).

For more information about BeginningReads, visit www.textproject.org/beginningreads
v.1.0 © 2012 TextProject, Inc. Some rights reserved (http://creativecommons.org/licenses/by-nc-nd/3.0/us/).

© 2006 by Craig Elliott. Some rights reserved (<http://creativecommons.org/licenses/by-nc-nd/2.0>).

Last summer, we picked cherries from our tree. We loved eating the cherries. But all winter long, the cherry tree has had no leaves and no cherries.

© 2012 by Alice Lee Folkins. Used by permission.

Now it is spring. There are tiny buds on the cherry trees. Soon, many of these tiny buds will open up into tiny flowers.

Snowdrop

© 2010 by Manafyama at Flickr. Some rights reserved (<http://creativecommons.org/licenses/by-nc-nd/2.0>).

The snowdrop flowers come out when winter is almost over. Snowdrop flowers are signs that spring is on the way.

© 2007 by Emma Campbell-Bland. Some rights reserved (<http://creativecommons.org/licenses/by-nc-nd/2.0>).

The backyard is covered with snow. But look closely under thin patches of snow. You might see green leaves poking through the snow.

© 2010 by noluck at Flickr. Some rights reserved (<http://creativecommons.org/licenses/by-nc-nd/2.0>).

The green leaves are those of a snowdrop plant. Snowdrop plants have long leaves that can poke through the snow. The small white flowers look like little drops of snow.

Melting Snow

© 2006 by Sandoz Weiss. Some rights reserved (http://creativecommons.org/licenses/by-nc-nd/2.0).

The water in the rivers flows to lakes or to the sea. Some of the water is saved for plants and people. The snow that fell all winter long becomes water for people to use.

© 2005 by dModel101 at Flickr. Some rights reserved (http://creativecommons.org/licenses/by-nc-nd/2.0).

For more information about BeginningReads, visit www.textproject.org/beginningreads
v.1.0 © 2012 TextProject, Inc. Some rights reserved (http://creativecommons.org/licenses/by-nc-nd/3.0/us/).

© 2009 by McOutdoorGuy at Flickr. Some rights reserved (<http://creativecommons.org/licenses/by-nc-nd/2.0>).

In the winter, the mountains are covered with snow and ice. In the spring, the snow and ice begin to melt.

© 2005 by color line at Flickr. Some rights reserved (<http://creativecommons.org/licenses/by/2.0>).

The water from the melting snow makes streams as it runs down the mountain. The streams make rivers.

Daytime

© 2007 by Lisa Harrison Paine. Some rights reserved (<http://creativecommons.org/licenses/by-nc-nd/2.0>).

Spring is almost here. It is not so dark when I get ready for school. That means that I have more time to play with my friends after school.

© 2011 by Jim Pennucci. Some rights reserved (<http://creativecommons.org/licenses/by/2.0>).
