Drones

Three black drones fly high in the blue sky. Birds watch as drones hang over trees and scan the green land below.

The pilot stands by the trees. The pilot presses fingers on a phone to have the drones climb, dive, and swing.

Children stand in a park and watch the drones move in the sky. Children see drones with wings slide through clouds.

Big drones carry boxes. Small drones take pictures. Drones help people see above and below. Drones can swim under water too.

When rain falls, the pilot brings the drones down. The three drones land safely by the pilot.
